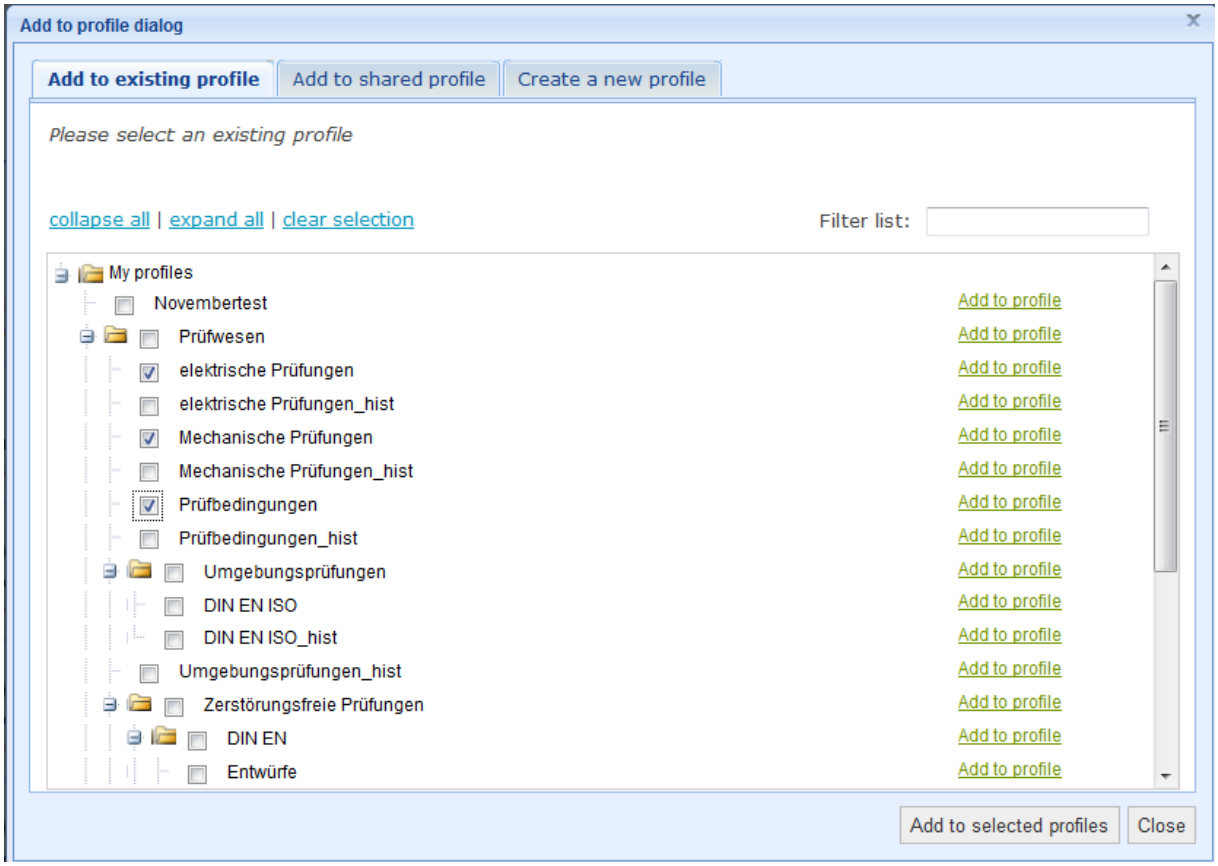
Release Notes for Perinorm Online - December 2015

In December 2015 some bug fixes and 2 new features are included in the online version of Perinorm. And the icons for full texts connected with Perinorm are modified.

The following new features are now active:

Records can be added to several profiles in one go:

In the Add to profile dialogue checkboxes were added. You can check all profiles to which you wish to add selected records.



When you click the button „Add to selected profiles“ below, the records will be included in these profiles.

Selection between two types of limitation on simultaneous users opening full texts of a full text collection:

In the edit full text dialog you find the radio buttons

- Limit per document
- Limit per collection

Bug fixes that will be added with this version include:

- Clearer hint texts in the “amended” tab of the user data update dialogue
- Improved messages, hint texts and button texts in several other dialogues
- Existing saved queries can be saved again with modified settings without having to rename them. A warning message will be shown to prevent unwanted overwriting.
- Export format settings corrected (no CSV fields required for formats like XML etc.)

The icons for full texts connected with Perinorm were modified

The symbols used up to now will be replaced by the following ones:

for German full text

for English full text

for several full texts

For leased documents (Beuth Standards Collection online) the following icons are used:

for German leased full text

for English leased full text

for several leased full texts
