DIN EN 13480-3/A4:2010-10 (E)

Metallic industrial piping - Part 3: Design and calculation

Contents

Page

Foreword 3

1 Addition of Annex Q 4

Annex Q (informative) Simplified pipe stress analysis 4

Q.1 General 4
Q.2 Simplified procedure 4
Q.2.1 General 4
Q.2.2 Specification of allowable spacing of supports 4
Q.2.3 Check of elasticity 4
Q.3 Explanatory notes for Table Q.1 6
Q.4 Symbols 8
Q.5 Indices fL 8
Q.6 Explanatory notes to Q.2.2 9
Q.6.1 Specification of allowable spacing of supports 9
Q.6.1.1 General 9
Q.6.1.2 Single field supports (moments free) L2 to L4 9
Q.6.1.3 Cantilever beam, L5 and L6 10
Q.7 Conversion of the allowable lengths 10
Q.7.1 Other support conditions 10
Q.7.2 Other parameters 10
Q.8 Additional single loads 11
Q.8.1 General 11
Q.9 Explanatory note on Figure Q.2 14
Q.9.1 General 14
Q.9.2 Required pipe leg length L1, for f1 from the nomogram 16
Q.9.3 Required pipe leg length L2, for f2 from the nomogram 16
Q.9.3.1 General 16
Q.9.3.2 Required pipe leg length for f1 from the nomogram 17
Q.9.3.3 Required pipe leg length for f2 from the nomogram 17
Q.9.3.4 Required pipe leg length for f2 from the nomogram 17
Q.9.3.5 Required pipe leg length for f3 from the nomogram 18
Q.9.3.6 Required pipe leg length for f 4 from the nomogram 18
Q.9.3.7 Required pipe leg length for f1 from the nomogram 19
Q.9.3.8 Required pipe leg length for f2 from the nomogram 19
Q.9.3.9 Required pipe leg length for f3 from the nomogram 20
Q.9.3.10 Required pipe leg length for f4 from the nomogram 20
Q.9.3.11 Required pipe leg length for f5 from the nomogram 20

2 Modification to the Bibliography 20
