Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Construction 7
4.1 General 7
4.2 Materials 7
4.3 Finish 7
4.4 Retention system 7
4.5 Headforms 8

5 Performance requirement 8
5.1 Shock absorption 8
5.2 Penetration 8
5.3 Retention system strength 9
5.4 Retention system effectiveness 9
5.5 Peak deflection 9

6 Testing 9
6.1 Assessment of extent of the area of protection and marking of test area 9
6.2 Test sequence and time schedule 10
6.3 Conditioning before testing 11
6.3.1 High temperature conditioning 11
6.3.2 Low temperature conditioning 11
6.3.3 Artificial ageing and moisture conditioning 11
6.4 Shock absorption test 11
6.4.1 Principle 11
6.4.2 Apparatus 11
6.5 Determination of resistance to penetration 15
6.5.1 Principle 15
6.5.2 Apparatus 15
6.5.3 Procedure 15
6.6 Test for strength of retention system 16
6.6.1 Principle 16
6.6.2 Apparatus 16
6.6.3 Procedure 16
6.7 Test for effectiveness of retention system 16
6.7.1 Principle 16
6.7.2 Apparatus 16
6.7.3 Procedure 19
6.8 Test for deflection of the peak 19
6.8.1 Principle 19
6.8.2 Apparatus 19
6.8.3 Test procedure 19

7 Marking and labelling 19

7.1 Marking 19
7.2 Information and instruction for the user 20

Annex A (informative) Alternative procedure for artificial ageing 21

Annex B (informative) Significant technical changes between this European Standard and Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 89/686/EEC Personal Protective Equipment 23

Bibliography 24
