

Information on Perinorm, August 2010

Dear Perinorm customer

hll/trd/2010-08-16

You may be interested in the following information regarding the new edition of Perinorm:

1. Introduction of new software

In July we received considerable feedback on the new software from customers using the single-user version. As well as questions about handling there were also reports of errors, particularly with respect to bookmarks, notes and profiles, but also company data. We concentrated on eradicating these errors in July.

In view of these error reports we decided not to deliver the new network and intranet version in July. Network and intranet customers are now being sent the new software for the first time in August.

2. Delivery of the new software / passwords

As some users of the single-user version still had problems using the new software last month we are once again sending both software versions to all our customers.

Network customers should note that the network password you were given in January for the old Perinorm is still valid while for the new Perinorm you will find a new password on your delivery note.

Please also note the following change in the password update. Following the data and software update you will see the following when Perinorm starts:

The screenshot shows the Perinorm activation interface. At the top right, there is a language dropdown set to 'English' and a user status message: 'Hello, you are not logged on. (Log on)'. Below this is a breadcrumb trail: 'You are here: Info'. The main heading is 'Perinorm activation' with a sub-heading 'Perinorm activation'. The text reads: 'Welcome to the Perinorm application. Before you can start using the many advantages this application has to offer, we would like to ask you to first activate this product. The relevant passwords have been supplied with the provided documentation.' Below this is an 'Activation' section with three input fields: 'License password', 'Export password', and 'Network password', each followed by a 'SAVE' button. On the left side, there is a sidebar with the Perinorm logo, the date '2010-03-01', and navigation links: '> Info', '> Register online', '> Demo version', and '> Distributors'. At the bottom left, there are logos for 'afnor GROUPE', 'BSI', and 'DIN'.

Please enter the password for Perinorm or Perinorm International as the licence password and click on "Save". From now on Perinorm International customers will only receive this one password; a separate password for Perinorm is no longer necessary.

Please enter the export password you were given in January and click on "Save". Leave the field empty if you have not subscribed to the export licence.

Enter the network password given next to your licence password on the delivery note.

Customers for the single-user version will not be asked for the network password.

Once you have entered the passwords a link "Continue" will appear. Click on this link.

3. The following document identifiers have been modified:

AC-Code	New document identifier	Old document identifier	Publication
DE45854038	DGUV Information 8010	GUV Information 8010	2010-01
DE45958073	VermKatG SN	VermGeoG SN	2008-01-29
