

DIN EN 1993-1-11:2010-12 (E)

Eurocode 3: Design of steel structures - Part 1-11: Design of structures with tension components (includes Corrigendum AC:2009)

Contents

Page

Foreword	3
1 General	4
1.1 Scope	4
1.2 Normative references	5
1.3 Terms and definitions	6
1.4 Symbols	7
2 Basis of design	8
2.1 General	8
2.2 Requirements	8
2.3 Actions	9
2.4 Design situations and partial factors	11
3 Material	11
3.1 Strength of steels and wires	11
3.2 Modulus of elasticity	11
3.3 Coefficient of thermal expansion	13
3.4 Cutting to length of Group B tension components	14
3.5 Lengths and fabrication tolerances	14
3.6 Friction coefficients	14
4 Durability of wires, ropes and strands	14
4.1 General	14
4.2 Corrosion protection of individual wires	15
4.3 Corrosion protection of the interior of Group B tension components	15
4.4 Corrosion protection of the exterior of Group B tension components	15
4.5 Corrosion protection of Group C tension components	16
4.6 Corrosion protection at connections	16
5 Structural analysis	16
5.1 General	16
5.2 Transient construction phase	16
5.3 Persistent design situation during service	17
5.4 Non-linear effects from deformations	17
6 Ultimate limit states	18
6.1 Tension rod systems	18
6.2 Prestressing bars and Group B and C components	18
6.3 Saddles	19
6.4 Clamps	22
7 Serviceability limit states	23
7.1 Serviceability criteria	23
7.2 Stress limits	23
8 Vibrations of cables	24
8.1 General	24
8.2 Measures to limit vibrations of cables	25
8.3 Estimation of risks	25

9	Fatigue	25
9.1	General	25
9.2	Fluctuating axial loads	26
Annex A (informative) Product requirements for tension components		27
Annex B (informative) Transport, storage, handling		30
