|---------------------------------------------------------------------------------------|----|
| European foreword .....                                                               | 3  |
| 1 Scope .....                                                                         | 4  |
| 2 Normative references .....                                                          | 4  |
| 3 Terms and definitions .....                                                         | 4  |
| 4 Safety requirements and test methods .....                                          | 5  |
| 4.1 Maximum height for bouldering .....                                               | 5  |
| 4.2 Impact absorbing material .....                                                   | 5  |
| 4.2.1 General .....                                                                   | 5  |
| 4.2.2 Impact attenuation .....                                                        | 5  |
| 4.3 Impact area .....                                                                 | 6  |
| 4.3.1 Size of the impact area .....                                                   | 6  |
| 4.3.2 Position of foam safety mats .....                                              | 7  |
| 4.4 Connection of modular foam safety mat elements .....                              | 8  |
| 4.5 Structural integrity .....                                                        | 8  |
| 4.6 Impact resistance and deflection of surface elements .....                        | 8  |
| 4.7 Panel insert resistance .....                                                     | 9  |
| 4.8 Falling space .....                                                               | 9  |
| 4.9 Bouldering wall surfaces .....                                                    | 9  |
| 5 Marking .....                                                                       | 9  |
| 6 Instruction manual .....                                                            | 10 |
| 7 Technical documentation of the bouldering wall .....                                | 10 |
| Annex A (normative) Effects .....                                                     | 11 |
| Annex B (normative) Method of calculating of structural integrity and stability ..... | 13 |
| Annex C (normative) Testing of shock absorbing surfaces .....                         | 15 |
| Annex D (normative) Test of surface elements .....                                    | 16 |
| Annex E (normative) Panel insert resistance test .....                                | 19 |
| Annex F (normative) Inspection and maintenance .....                                  | 21 |
| Annex G (normative) Testing of the impact area connecting system .....                | 23 |
| Bibliography .....                                                                    | 25 |
