

# ISO 13843:2017-06 (E)

## Water quality - Requirements for establishing performance characteristics of quantitative microbiological methods

---

| Contents                                                                                                                  | Page |
|---------------------------------------------------------------------------------------------------------------------------|------|
| Foreword .....                                                                                                            | v    |
| Introduction .....                                                                                                        | vi   |
| 1 Scope .....                                                                                                             | 1    |
| 2 Normative references .....                                                                                              | 1    |
| 3 Terms and definitions .....                                                                                             | 1    |
| 4 Basic concepts .....                                                                                                    | 6    |
| 4.1 General .....                                                                                                         | 6    |
| 4.2 Characterization .....                                                                                                | 7    |
| 4.3 Verification .....                                                                                                    | 8    |
| 4.4 Method comparison .....                                                                                               | 8    |
| 4.5 Samples .....                                                                                                         | 9    |
| 5 Specifications: some guideline values .....                                                                             | 9    |
| 6 Designs for determining performance characteristics of a method .....                                                   | 10   |
| 6.1 General considerations .....                                                                                          | 10   |
| 6.2 Determination of sensitivity, specificity, efficiency, selectivity, false positive rate and false negative rate ..... | 10   |
| 6.2.1 Type of samples to be used .....                                                                                    | 10   |
| 6.2.2 Number of samples .....                                                                                             | 11   |
| 6.2.3 Procedure .....                                                                                                     | 11   |
| 6.2.4 Categorical performance characteristics .....                                                                       | 11   |
| 6.2.5 Worked example .....                                                                                                | 12   |
| 6.3 Determination of the upper limit and consideration of the lower limit of detection .....                              | 14   |
| 6.3.1 Working range .....                                                                                                 | 14   |
| 6.3.2 Upper limit related to linearity .....                                                                              | 14   |
| 6.3.3 Type and number of samples to be used .....                                                                         | 14   |
| 6.3.4 Worked example .....                                                                                                | 15   |
| 6.3.5 The lower limit of detection .....                                                                                  | 16   |
| 6.4 Assessment of precision: Determination of repeatability and reproducibility .....                                     | 16   |
| 6.4.1 General .....                                                                                                       | 16   |
| 6.4.2 Repeatability .....                                                                                                 | 17   |
| 6.4.3 Intralaboratory reproducibility .....                                                                               | 18   |
| 6.5 Robustness .....                                                                                                      | 20   |
| 6.5.1 General .....                                                                                                       | 20   |
| 6.5.2 Experimental designs for effects due to time and temperature .....                                                  | 20   |
| 6.6 Relative recovery .....                                                                                               | 21   |
| 6.6.1 General .....                                                                                                       | 21   |
| 6.6.2 Determination of relative recovery .....                                                                            | 21   |
| 6.7 Uncertainty of counting .....                                                                                         | 22   |
| 6.7.1 General .....                                                                                                       | 22   |
| 6.7.2 Experimental design for assessing the uncertainty of counting colonies .....                                        | 22   |
| 6.7.3 Example of individual (or personal) uncertainty of counting colonies .....                                          | 22   |
| 6.7.4 Example of intralaboratory uncertainty of counting colonies .....                                                   | 23   |
| 6.7.5 Example of intralaboratory uncertainty of reading MPN .....                                                         | 23   |

|                              |                                                                                                                                  |           |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>7</b>                     | <b>Designs for single laboratory verification of a method .....</b>                                                              | <b>24</b> |
| <b>7.1</b>                   | <b>General considerations .....</b>                                                                                              | <b>24</b> |
| <b>7.2</b>                   | <b>Calculation of sensitivity, specificity, efficiency, selectivity, false positive rate and false negative rate .....</b>       | <b>24</b> |
| <b>7.2.1</b>                 | <b>Type of sample to be used .....</b>                                                                                           | <b>24</b> |
| <b>7.2.2</b>                 | <b>Number of samples .....</b>                                                                                                   | <b>25</b> |
| <b>7.2.3</b>                 | <b>Procedure for confirmation .....</b>                                                                                          | <b>25</b> |
| <b>7.2.4</b>                 | <b>Categorical performance characteristics .....</b>                                                                             | <b>25</b> |
| <b>7.3</b>                   | <b>Determination of repeatability .....</b>                                                                                      | <b>26</b> |
| <b>7.4</b>                   | <b>Uncertainty of counting .....</b>                                                                                             | <b>26</b> |
| <b>7.5</b>                   | <b>Procedure for single laboratory verification .....</b>                                                                        | <b>26</b> |
| <b>Annex A (informative)</b> | <b>Mathematical models of variation .....</b>                                                                                    | <b>30</b> |
| <b>Annex B (normative)</b>   | <b>Assessment of the lower limits .....</b>                                                                                      | <b>40</b> |
| <b>Annex C (normative)</b>   | <b>Assessment of the upper limit .....</b>                                                                                       | <b>43</b> |
| <b>Annex D (normative)</b>   | <b>Determination of the operational variability in repeatability and intralaboratory reproducibility conditions .....</b>        | <b>44</b> |
| <b>Annex E (normative)</b>   | <b>Uncertainty of counting .....</b>                                                                                             | <b>48</b> |
| <b>Annex F (normative)</b>   | <b>Determination of the operational variability (interlaboratory reproducibility) in a collaborative performance study .....</b> | <b>50</b> |
| <b>Annex G (informative)</b> | <b>Glossary of principal symbols .....</b>                                                                                       | <b>58</b> |
| <b>Bibliography</b>          | <b>.....</b>                                                                                                                     | <b>60</b> |
