

DIN EN ISO 12217-1:2013-06 (E)

Small craft - Stability and buoyancy assessment and categorization - Part 1: Non-sailing boats of hull length greater than or equal to 6 m (ISO 12217-1:2013)

Contents	Page
Foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	6
3.1 Primary	6
3.2 Downflooding	8
3.3 Dimensions, areas and angles	9
3.4 Condition, mass and volume	11
3.5 Other terms and definitions	13
4 Symbols	15
5 Procedure	17
5.1 Maximum load	17
5.2 Sailing or non-sailing	17
5.3 Tests and calculations to be applied	17
5.4 Variation in input parameters	17
6 Tests, calculations and requirements	18
6.1 Downflooding	18
6.2 Offset-load test	23
6.3 Resistance to waves and wind	24
6.4 Heel due to wind action	26
6.5 Recess size	27
6.6 Habitable multihull boats	30
6.7 Motor sailers	30
6.8 Flotation requirements	31
6.9 Detection and removal of water	31
7 Application	31
7.1 Deciding the design category	31
7.2 Meaning of the design categories	31
Annex A (normative) Full method for required downflooding height	33
Annex B (normative) Method for offset-load test	36
Annex C (normative) Methods for calculating downflooding angle	44
Annex D (normative) Method for measuring freeboard margin	46
Annex E (normative) Determining the curve of righting moments	48
Annex F (normative) Method for level flotation test	51
Annex G (normative) Flotation material and elements	56

Annex H (normative) Information for owner's manual	58
Annex I (informative) Summary of requirements	60
Annex J (informative) Worksheets	61
Bibliography	78
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 94/25/EC as amended by Directive 2003/44/EC	79
