

ISO 11262:2011-11 (E)

Soil quality - Determination of total cyanide

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
4.1 Direct liberation of hydrogen cyanide using orthophosphoric acid	2
4.2 Determination of total cyanide content	2
5 Reagents	2
5.1 Reagents for liberation and absorption of cyanide	2
5.2 Reagents for the photometric determination of cyanide	3
5.3 Reagents for the titrimetric determination of cyanide	3
6 Apparatus	4
7 Sample preservation and preparation	5
7.1 Sample preservation	5
7.2 Sample preparation	5
8 Direct liberation using orthophosphoric acid	6
8.1 Procedure	6
8.2 Blank test	6
9 Determination of cyanide -- Photometric method	7
9.1 Applicability	7
9.2 Procedure	7
9.3 Preparation of the calibration graph	7
9.4 Calculation	7
10 Determination of cyanide -- Titrimetric method using an indicator	8
10.1 Applicability	8
10.2 Procedure	8
10.3 Calculation	9
11 Expression of results	9
12 Precision	10
13 Test report	10
Annex A (informative) Precision data	11
Annex B (informative) Extraction with sodium hydroxide solution and subsequent liberation using orthophosphoric acid	12

Annex C (informative) Comparison of the direct liberation of total cyanide and sodium hydroxide extraction with subsequent liberation	15
Bibliography	16
