|--------------------------------------------------------------------------------|----|
| Foreword .....                                                                 | v  |
| Introduction.....                                                              | vi |
| 1 Scope.....                                                                   | 1  |
| 2 Conformance.....                                                             | 1  |
| 2.1 Dual citing of normative references.....                                   | 1  |
| 2.2 Units of measurement.....                                                  | 2  |
| 3 Normative references .....                                                   | 2  |
| 4 Terms, definitions, symbols and abbreviated terms .....                      | 4  |
| 4.1 Terms and definitions .....                                                | 4  |
| 4.2 Symbols and abbreviated terms.....                                         | 8  |
| 5 Information to be supplied when placing orders for drill-pipe.....           | 10 |
| 5.1 Grades D95 and F105 .....                                                  | 10 |
| 5.2 General Information .....                                                  | 11 |
| 5.3 Additional Information .....                                               | 11 |
| 6 Requirements for drill-pipe .....                                            | 13 |
| 6.1 General.....                                                               | 13 |
| 6.2 Dimensions, masses and connections.....                                    | 13 |
| 6.3 Material requirements .....                                                | 14 |
| 6.4 Process of manufacture for drill-pipe .....                                | 17 |
| 6.5 Traceability.....                                                          | 18 |
| 6.6 Inspection and testing — General .....                                     | 18 |
| 6.7 Testing of welds.....                                                      | 19 |
| 6.8 Tensile test.....                                                          | 19 |
| 6.9 Hardness test.....                                                         | 20 |
| 6.10 Charpy V-notch impact test.....                                           | 21 |
| 6.11 Transverse side-bend test.....                                            | 22 |
| 6.12 Imperfections and defects in drill-pipe.....                              | 23 |
| 6.13 Visual inspection of the drill-pipe weld zone .....                       | 23 |
| 6.14 Non-destructive examination of the weld zone.....                         | 24 |
| 6.15 Marking of drill-pipe .....                                               | 25 |
| 6.16 Minimum facility requirements for drill-pipe manufacturers.....           | 27 |
| 6.17 Documentation requirements of drill-pipe .....                            | 27 |
| 7 Requirements for drill-pipe body .....                                       | 28 |
| 7.1 Information to be supplied when placing orders for drill-pipe bodies ..... | 28 |
| 7.2 Dimensional and mass requirements.....                                     | 29 |
| 7.3 Material requirements .....                                                | 30 |
| 7.4 Process of manufacture .....                                               | 32 |
| 7.5 Traceability.....                                                          | 32 |
| 7.6 Inspection and testing — General .....                                     | 33 |
| 7.7 Testing of chemical composition.....                                       | 33 |
| 7.8 Tensile tests .....                                                        | 34 |
| 7.9 Charpy V-notch impact tests.....                                           | 35 |
| 7.10 Drill-pipe-body wall thickness .....                                      | 36 |

|                       |                                                                               |     |
|-----------------------|-------------------------------------------------------------------------------|-----|
| 7.11                  | Drill-pipe-body length.....                                                   | 36  |
| 7.12                  | Internal upset .....                                                          | 37  |
| 7.13                  | Internal profile.....                                                         | 37  |
| 7.14                  | Straightness .....                                                            | 37  |
| 7.15                  | Upset alignment.....                                                          | 37  |
| 7.16                  | Mass determination.....                                                       | 38  |
| 7.17                  | Imperfections and defects of drill-pipe body .....                            | 38  |
| 7.18                  | Visual inspection of drill-pipe body .....                                    | 38  |
| 7.19                  | Non-destructive examination.....                                              | 39  |
| 7.20                  | Marking .....                                                                 | 42  |
| 7.21                  | Minimum facility requirements for drill-pipe-body manufacturer .....          | 43  |
| 7.22                  | Documentation requirements .....                                              | 44  |
| 8                     | Requirements for tool joints.....                                             | 45  |
| 8.1                   | Information to be supplied when placing orders for tool joints .....          | 45  |
| 8.2                   | Dimensional requirements .....                                                | 45  |
| 8.3                   | Material requirements .....                                                   | 46  |
| 8.4                   | Process of manufacture .....                                                  | 47  |
| 8.5                   | Traceability.....                                                             | 48  |
| 8.6                   | Inspection and testing — General .....                                        | 48  |
| 8.7                   | Testing of chemical composition .....                                         | 48  |
| 8.8                   | Tensile tests .....                                                           | 49  |
| 8.9                   | Hardness tests.....                                                           | 50  |
| 8.10                  | Charpy V-notch impact tests.....                                              | 51  |
| 8.11                  | Imperfections and defects.....                                                | 52  |
| 8.12                  | Non-destructive examination .....                                             | 52  |
| 8.13                  | Marking .....                                                                 | 53  |
| 8.14                  | Minimum facility requirements for tool-joint manufacturers .....              | 54  |
| 8.15                  | Documentation requirements for tool joints.....                               | 54  |
| Annex A (normative)   | Tables in SI units .....                                                      | 56  |
| Annex B (normative)   | Figures in SI (USC) units .....                                               | 75  |
| Annex C (normative)   | Tables in USC units.....                                                      | 89  |
| Annex D (normative)   | Purchaser inspection.....                                                     | 107 |
| Annex E (informative) | Supplementary requirements .....                                              | 108 |
| Annex F (informative) | Procedures used to convert from USC units to SI units for drill-<br>pipe..... | 111 |
| Annex G (normative)   | Product specification levels.....                                             | 115 |
| Bibliography.....     |                                                                               | 117 |
