

DIN EN 13146-3:2012-06 (E)

Railway applications - Track - Test methods for fastening systems - Part 3: Determination of attenuation of impact loads

| Contents | Page |
|--|------|
| Foreword | 3 |
| 1 Scope | 4 |
| 2 Normative references | 4 |
| 3 Terms and definitions, symbols and abbreviations | 4 |
| 3.1 Terms and definitions | 4 |
| 3.2 Symbols and abbreviations | 4 |
| 4 Principle | 5 |
| 5 Apparatus | 5 |
| 5.1 Concrete sleeper or bearer | 5 |
| 5.2 Support | 5 |
| 5.2.1 Reference method | 5 |
| 5.2.2 Alternative method | 6 |
| 5.3 Rail | 6 |
| 5.4 Strain measuring and recording equipment | 6 |
| 5.5 Drop mass | 6 |
| 5.6 Preloading equipment | 7 |
| 6 Test specimens | 7 |
| 6.1 Concrete sleeper or bearer | 7 |
| 6.2 Fastening | 7 |
| 7 Procedure - Reference method | 8 |
| 7.1 Preparation | 8 |
| 7.2 Testing | 8 |
| 7.3 Check on sleeper condition | 8 |
| 7.4 Calculation | 8 |
| 8 Procedure - Alternative method | 9 |
| 8.1 Preparation | 9 |
| 8.2 Testing and checking | 9 |
| 8.3 Calculation | 9 |
| 9 Test report | 9 |
| Annex A (informative) Sample calculation | 11 |
