|--------------------------------------------------------------------------|-----------|
| <b>European foreword</b> .....                                           | <b>4</b>  |
| <b>Foreword</b> .....                                                    | <b>5</b>  |
| <b>Introduction</b> .....                                                | <b>6</b>  |
| <b>1 Scope</b> .....                                                     | <b>7</b>  |
| <b>2 Normative references</b> .....                                      | <b>7</b>  |
| <b>3 Method A — Extraction with anhydrous methanol</b> .....             | <b>7</b>  |
| 3.1 Principle .....                                                      | 7         |
| 3.2 Reagents .....                                                       | 8         |
| 3.3 Apparatus .....                                                      | 8         |
| 3.4 Preparation of test sample .....                                     | 8         |
| 3.4.1 Granules or powder .....                                           | 8         |
| 3.4.2 Finished articles .....                                            | 8         |
| 3.5 Procedure .....                                                      | 9         |
| 3.5.1 Precautions .....                                                  | 9         |
| 3.5.2 Preparation of test portions .....                                 | 9         |
| 3.5.3 Determination .....                                                | 9         |
| 3.6 Expression of results .....                                          | 9         |
| 3.7 Precision .....                                                      | 10        |
| <b>4 Method B1 — Water vaporization using a heating tube oven</b> .....  | <b>10</b> |
| 4.1 Principle .....                                                      | 10        |
| 4.2 Reagents .....                                                       | 10        |
| 4.3 Apparatus .....                                                      | 11        |
| 4.4 Preparation of test sample .....                                     | 12        |
| 4.5 Procedure .....                                                      | 12        |
| 4.5.1 Precautions .....                                                  | 12        |
| 4.5.2 Preparation of apparatus .....                                     | 12        |
| 4.5.3 Equipment check .....                                              | 12        |
| 4.5.4 Determination .....                                                | 14        |
| 4.6 Expression of results .....                                          | 14        |
| 4.7 Precision .....                                                      | 15        |
| <b>5 Method B2 — Water vaporization using a heated sample vial</b> ..... | <b>15</b> |
| 5.1 Principle .....                                                      | 15        |
| 5.2 Reagents .....                                                       | 15        |
| 5.3 Apparatus .....                                                      | 16        |
| 5.4 Preparation of test sample .....                                     | 17        |
| 5.5 Procedure .....                                                      | 18        |
| 5.5.1 Preparation of apparatus .....                                     | 18        |
| 5.5.2 Equipment check .....                                              | 18        |
| 5.5.3 Determination .....                                                | 18        |
| 5.6 Expression of results .....                                          | 20        |
| 5.7 Precision .....                                                      | 20        |

|          |                                                                                                               |           |
|----------|---------------------------------------------------------------------------------------------------------------|-----------|
| <b>6</b> | <b>Method C — Manometric method</b>                                                                           | <b>21</b> |
| 6.1      | Principle                                                                                                     | 21        |
| 6.2      | Reagents                                                                                                      | 21        |
| 6.3      | Apparatus                                                                                                     | 21        |
| 6.4      | Preparation of test sample                                                                                    | 22        |
| 6.5      | Procedure                                                                                                     | 22        |
|          | 6.5.1 Equipment                                                                                               | 22        |
|          | 6.5.2 Outgassing                                                                                              | 23        |
|          | 6.5.3 Calibration                                                                                             | 23        |
|          | 6.5.4 Determination                                                                                           | 24        |
| 6.6      | Expression of results                                                                                         | 26        |
| 6.7      | Precision                                                                                                     | 26        |
| <b>7</b> | <b>Test report</b>                                                                                            | <b>26</b> |
|          | <b>Annex A (informative) Alternative sample preparation methods and titration methods</b>                     | <b>27</b> |
