

ISO/IEC 14756:1999-11 (E)

Information technology - Measurement and rating of performance of computer-based software systems

Contents		Page
Foreword		v
Introduction		VI
Section 1: General		1
1	Scope	1
2	Conformance	3
3	Normative reference	3
4	Definitions	4
5	Abbreviations and symbols	7
5.1	Abbreviations	7
5.2	Symbols	8
Section 2: Principles of measurement and rating		10
6	The measurement	10
6.1	Configuration requirements	10
6.2	User emulation	10
6.2.1	Random user behaviour	10
6.2.2	Remote terminal emulator	10
6.2.3	Workload parameter set	11
6.2.4	Parameter set for proving the accuracy of the user emulation	11
6.3	The measurement procedure	12
6.3.1	The time phases of the measurement procedure	12
6.3.2	Writing a measurement logfile	13
6.3.3	Writing a computation result file	13
6.4	Proof of validity of the measurement	13
6.4.1	Proof of the CBSS's computational correctness	13
6.4.2	Proof of the remote terminal emulator's accuracy	13
6.4.3	Proof of the measurement result's statistical significance	13
7	Calculation of the performance values of the SUT	14
7.1	Mean execution time	14
7.2	Throughput	14
7.3	Timely throughput	14
8	Basic data for rating	14
8.1	User requirements	14
8.2	The reference environment for rating software efficiency	14
8.2.1	Reference environment for assessing application software efficiency	15
8.2.2	Reference environment for assessing system software efficiency	15
9	Rating the Performance values	15
9.1	Computing the performance reference values	15
9.1.1	Mean execution time reference values	15
9.1.2	Throughput reference values	15
9.2	Computing the performance rating values	15

9.2.1	The mean execution time rating values	15
9.2.2	Throughput rating values	15
9.2.3	The timeliness rating values.....	16
9.3	Rating the overall performance of the SUT.....	16
9.4	Assessment of performance	17
9.4.1	The steps of assessment process	17
9.4.2	Weak reference environment.....	17
Section 3: Detailed procedure for measurement and rating		18
10	Input requirements	18
10.1	The SUT description.....	18
10.1.1	Specification of the hardware architecture and configuration	18
10.1.2	Specification of the system software configuration	18
10.1.3	The application programs.....	19
10.1.4	Additional software required for the measurement run	19
10.1.5	The stored data	19
10.1.6	Additional information for proof	19
10.2	The workload parameter set.....	19
10.2.1	The activity types.....	19
10.2.2	Activity input variation	20
10.2.3	The task types with timeliness function and task mode	20
10.2.4	The chain types and their frequencies	21
10.2.5	Preparation times' mean values and their standard deviations	21
10.3	Input for measurement validation.....	22
10.3.1	Correct computation results.....	22
10.3.2	Variation of input data and its resulting output.....	22
10.3.3	Criteria for precision of working of the RTE	22
10.3.4	Criteria for statistical validity of results	22
11	The measurement	22
11.1	The measurement procedure	22
11.2	Individual rating interval	23
12	Output from measurement procedure.....	25
12.1	Measurement logfile	25
12.2	Computation result file.....	25
13	Validation of measurements.....	26
13.1	Validation of the computational correctness of the SUT	26
13.2	Validation of the accuracy of the RTE	26
13.2.1	Validity test by checking the relative chain frequencies.....	26
13.2.2	Validity test by checking the preparation times	26
13.3	Validation of the statistical significance of the measured mean execution time	27
14	Calculation of the performance values of the SUT	28
14.1	Mean execution time	28
14.2	Throughput.....	28
14.3	Timely throughput	28
15	Rating the measured Performance values of the SUT.....	29
15.1	Specification of rating level.....	29
15.2	Computing performance reference values	29
15.2.1	Mean execution time reference values.....	29
15.2.2	Throughput reference values	29
15.3	Computing rating values.....	29
15.3.1	Computing mean execution time rating values.....	29
15.3.2	Computing throughput rating values	30
15.3.3	Computing timeliness rating values.....	30
15.4	Rating.....	30
15.4.1	Mean execution time rating	30
15.4.2	Throughput rating.....	31

15.4.3	Timeliness rating	31
15.4.4	Overall rating	31
Annex A (normative)	Specification of the RTE's basic functions	32
Annex B (normative)	Additional calculation formulas	33
Annex C (normative)	Format of the workload description	41
Annex D (normative)	Format of the logfile.....	45
Annex E (informative)	Utility programs.....	46
Annex F (informative)	Examples of workloads	48
