

Perinorm information December 2020

fej 2020-12-02

Dear Perinorm user,

Please take note of the following information concerning the current Perinorm:

1. Adjustment of prices for Perinorm as from 1 January 2021

It has been agreed within the Perinorm consortium to increase the annual fee for all Perinorm variants and the export licence by 2 % as from 1 January 2021.

2. Information on specific collections

The following collections have not been updated in this month's production (the production in which we made the last update is given in brackets):

ANSI	(2019-03)
GOST	(2020-10)

New collection: CIA

In the 2012-12 issue, the CIA (CAN in Automation) collection is included for the first time. CIA is the international users' and manufacturers' association tasked with the dissemination and standardization of the CAN ([Controller Area Network](#)). The collection of documents issued by CIA comprises 145 current and 12 historic records.

Collection discontinued: DIN NEWSLETTER

The DIN NEWSLETTER collection hitherto contained records in the form of German-language notifications about changes to the standard DIN EN ISO 3166 "Codes for the representation of names of countries and their subdivisions - Part 1: Country code". The 2020-12 edition of the standard no longer contains the alphabetical list of countries and their codes, nor the index of the short forms of the country names. Consequently, it is no longer necessary to issue change notifications. As a result, the six remaining records in the DIN NEWSLETTER collection are being withdrawn without replacement and the collection is no longer being included in Perinorm. Background information on the changeover and details of where to find the country names are contained in the National Foreword of DIN EN ISO 3166-1:2020-12, where it is explained that the change in the format of the standard and the decision to only provide access via the ISO OBP (Open Browsing Platform, <https://www.iso.org/obp/ui/>) means that it was no longer feasible to issue the standard in its hitherto form as this is outdated and no longer user-friendly.

For this reason, a German-language version will no longer be issued, and reference is made to ISO's Open Browsing Platform (OBP) for the country codes and, for the names of countries in German, to the following sources:

Germany: "Länderverzeichnis für den amtlichen Gebrauch in der Bundesrepublik Deutschland" at www.diplo.de/terminologie. The 2-code and 3-code elements are also listed there.

Austria: "Liste der Staatennamen und deren Ableitungen in den vom Bundesministerium für Europa, Integration und Äußeres verwendeten Formen" at <https://www.bmeia.gv.at/europaaussenpolitik/voelkerrecht/staatenliste>.

Switzerland: “Entries in the The Federal Administration’s terminology database TERMDAT” at <https://www.bk.admin.ch/bk/en/home/dokumentation/languages/termdat.html>).

These indexes were used as the basis for the country names used in DIN EN ISO 31661. The Publications Office of the European Union also publishes the following compilation:

EU: “Interinstitutional Style Guide, Annex A5: List of countries, territories and currencies” at <https://publications.europa.eu/code/en/en-000100.htm>
